

Artemis Floor Mirror

ANTI-TIP KIT INSTRUCTIONS

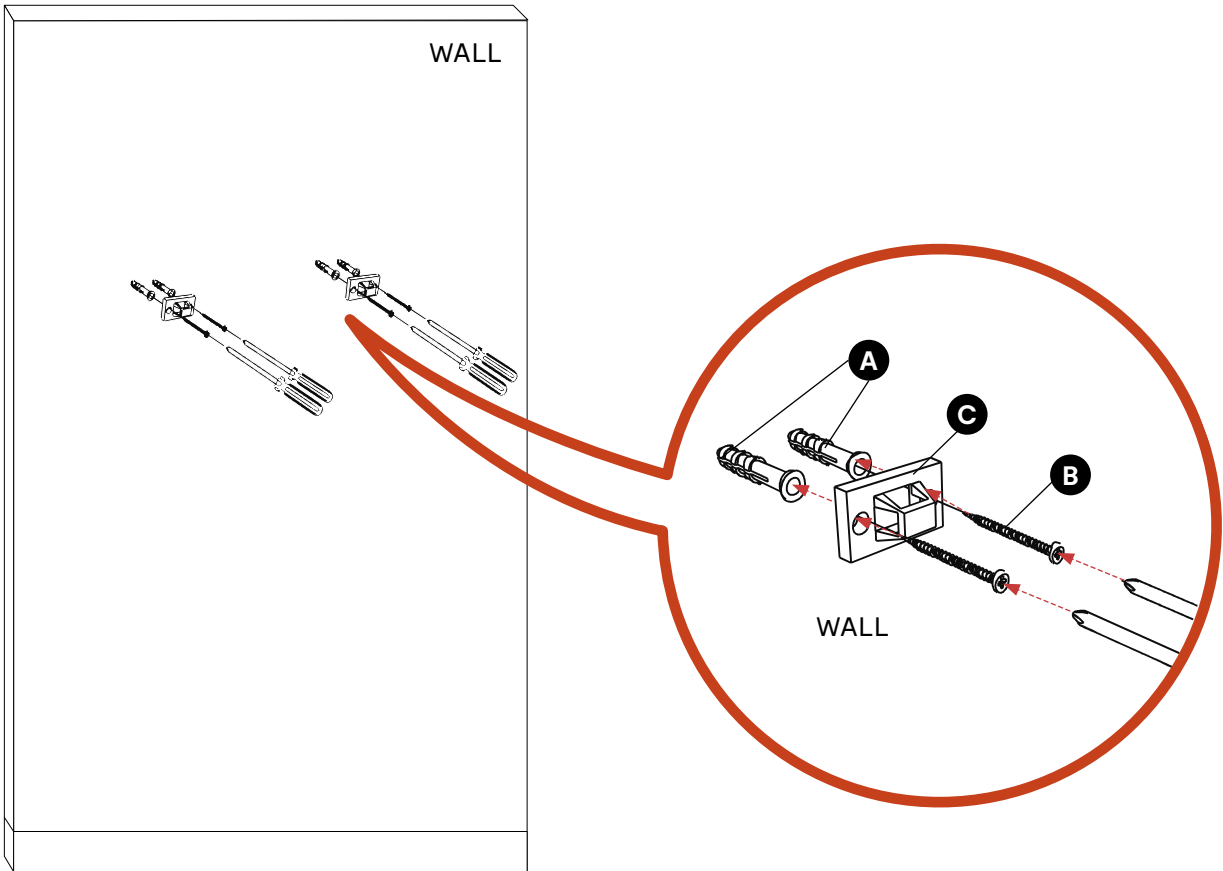

ASSEMBLY INSTRUCTIONS

Read these instructions carefully and keep for future reference. Refer to parts inventory for guidance, and ensure you have all pieces before starting. When assembling, place all parts on a soft, clean, and flat surface such as a carpet to prevent scratches.

HARDWARE INVENTORY			
ID	IMAGE	DESCRIPTION	QTY
A		WALL ANCHORS	5
B		SCREWS	5
C		WALL CLIP	2
D		ZIP TIE	2

STEP 1

Determine the type of wall you'll be hanging the mirror against. Make sure the placement of the **WALL CLIP (C)** is level and use a pencil to mark the two holes through the **WALL CLIP (C)**. Use a drill to drill the holes in the marks you created with the pencil. If you can find a stud in the wall to screw the **WALL CLIP (C)** into, then you only need to use the screws. If you cannot locate a stud, you will need to use the **WALL ANCHORS (A)** to secure the **WALL CLIPS (C)** safely to the wall. Then use the **SCREWS (B)** to attach the **WALL CLIPS (C)** to the wall.

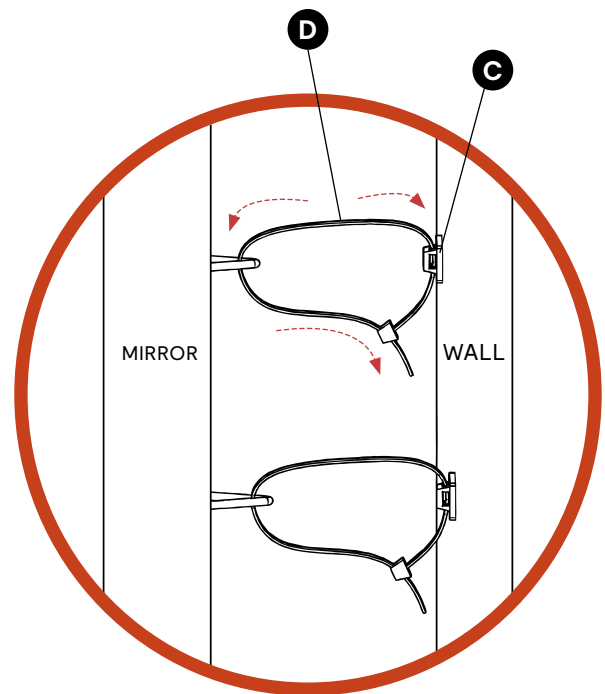

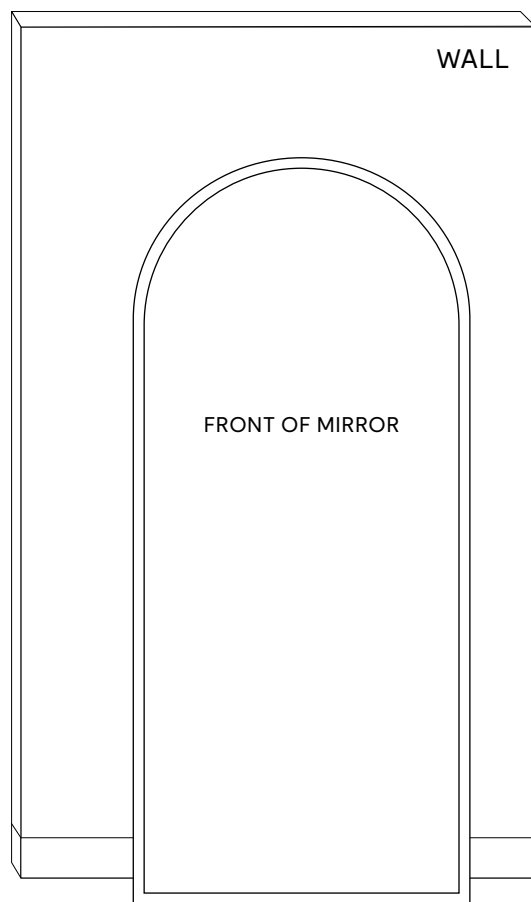

*Parts not included: Phillips head screwdriver/drill, Pencil, Level, Stud Finder.

JOON LOLOI

STEP 2

Once the **WALL CLIPS (C)** have been securely screwed into the wall, make sure the base of the mirror is on a flat surface. Then you can loop the **ZIP TIES (D)** through a **WALL CLIP (C)** then, through the metal loops on the back of the floor mirror. Once the **ZIP TIE (D)** is through both loops creating a circle, thread the pointed end through the square notch on the other end of the **ZIP TIE (D)**.

CARE INSTRUCTIONS

Avoid direct exposure to sunlight. Do not place over heat or air conditioning vents. Wipe ideally with a soft cotton cloth. Do not use harsh chemicals. Before cleaning any part, test a small spot in a hidden area. You may need to re-tighten all screws after initial use.
