STEP 1

Place the **DRESSER (1)** upside down to easily access the bottom, then attach each **LEG (2)** by rotating it clockwise until firmly tightened, and repeat this process for all legs.

STEP 2

The **LEVELING GLIDE (A)** is located at the bottom of the **DRESSER (1)**. Once the furniture is in the desired position, you can adjust the leveling glides based on the surface to ensure the dresser is level and stable. When the dresser is properly leveled, the assembly is complete.
